

DIGITAL PHOTOGRAPHY CHECKLIST/GUIDE

Name: _____

Partner: _____

Camera Model/#: _____

Refer to the course Weebly site for updated project information:

www.bcicommttech11-12.weebly.com

PHOTOGRAPHY INSTRUCTIONS:

- Working with your partner, you will learn the basic operations of your specific digital SLR camera. Make sure to record the model and camera number above. You will use the same camera for the duration of the project.
- While you will work together to learn how to use the camera, you are responsible for taking your own set of images that you will use for your Flash Photo Gallery project later in the course.
- Use the checklist below and the attached log sheets to assist you with tracking your photographs. Make sure to keep accurate records when completing your photography assignment.
- Refer to the camera manual to assist you with specific camera settings, etc. Copies are available in class or on the Weebly site.
- At the end of each class, you and your partner MUST move all photos from the camera onto your computer (set up a folder on the "D" drive for your individual pictures). You should consider creating a set of sub-folders to organize your images based on the types of photographs you are taking (ex. Rule of Thirds, Shutter Speed, Product Photography). **DO NOT LEAVE PICTURES ON THE CAMERA'S MEMORY CARD AS OTHER STUDENTS MAY BE USING YOUR CAMERA! AVOID HAVING YOUR WORK DELETED!**

PHOTOGRAPHY CHECKLIST:
